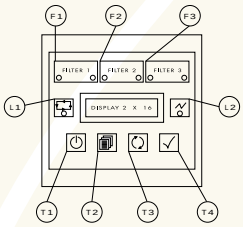
Air purification control panel option

The air purification control panel ensures a better operating control of the units main functions.

Weekly starting / stopping can be programmed • Filter operating hours can be verified as well as the remaining operating hours • Filter pressure can be verified • Fan's total operating hours can be verified • Unit starting / stopping by means of the air quality feeler (optional) • UV germicidal lamp notification



The control panel was designed in order to control the main functions of the purification system unit.

This electronic control card assures that the unit is functioning properly by scheduling fan's starting operation, controlling the filters and UV lamp usage.

The control panel also allows easy and fast visibility to view the units condition.

Control buttons:

- *Four key buttons: T1, T2, T3, T4.*
- *Two LED lights for unit function: L1, L2.*
- *Tree labels representing the filters: F1, F2, F3, each of them having two LED lights. (Green & Red)*
- *A LCD display screen 2 x 16 cm.*

The control panel also displays the air quality and enables you to start the fan depending on air pollution.

The control panel can read sensors placed on the filters inlet and the other placed on the outlet, in order to check by comparison the filter's saturation.

Weekly starting can be programmed / Remaining filter functioning hours can be viewed / Fan's total functioning hours can be viewed.
